

The engineer's most important career development... and you can conquer it! While many engineers are weak in these skills, use your secret advantage to master management and leadership!

2, 3, or 5-Day Workshops

Presenter

Dr. Michael Aucoin, PE, PMP

Audience

Entry-Level Engineers
Early Career Engineers
Mid-Career Engineers
Engineering Managers

Delivery

For In-House Organizational Development

You worked hard for that engineering degree, you're dedicated to your engineering work. Then comes the promotion to manager... Congratulations!

Most engineers will spend the majority of a career in management or leadership roles. The transition may be unexpected, unwelcome, and may cause discomfort.

Now, imagine leading your team with skill and confidence, and doing great things together.

In reality, engineers reach their potential and achieve greatest impact when in leadership roles.

Your *Secret Advantage* means you can leverage your solid foundation in systems and your engineering approach and apply it to organizations. Turn your transition into the best part of becoming an engineer!

Benefits:

- Learn the secrets to successful technical management and leadership
- Leverage and build upon engineers' strengths
- Use your mastery of systems thinking to apply to organizations
- Enhance team motivation and productivity
- Apply concepts immediately to work in progress
- Learn how to impress executives and customers
- Develop effective team communications and meetings
- Master attitudes to overcome problems and surprises
- Enhance confidence and esteem
- Unique delivery process with pre-work, post-work, and virtual collaboration
